

Bookmarks

For Chrome on iPad

When you open a page on Chrome, for example:

On the top, there are several icons on the bottom. We'll use those icon names in this article:

1. "Previous" icon "<" takes you to the previous tab
2. "Next" icon ">" takes you to the next tab
3. "Add Bookmark" icon - a "star" icon, for adding the current page to the bookmark. When the star is filled, the page is already in the Bookmarks, otherwise it will be added to the bookmarks
4. "Action" icon - An open square with an upward arrow, takes you to various actions for the current webpage, such as copy, airdrop, etc. One of them is "Edit bookmarks".
5. "More" icon - the three dots on the top right, giving you many more actions, one of them is "Bookmarks". Selecting it will let you see your bookmarks.

Manage Bookmarks

- To save the webpage to the bookmarks - Select the “Add Bookmark” (the star icon)
- To revisit the webpage from the Bookmarks - Select the “More” -> “Bookmarks”
- To remove the link from your Bookmarks - Select the “More” -> “Bookmarks”. Find the item on the list you want to remove, swipe left and click on “delete”
